

MOEEZ AHMAD KHAN

03035772640 • kmoez2018@gmail.com • Lahore, Pakistan • Portfolio

Professional Objective

An **AI/ML Developer** specializing in **Generative AI**, Computer Vision, and Full-Stack development. Proven track record in architecting autonomous agents and high-performance identification pipelines, bridging the gap between research and production-ready software solutions.

Skills & Expertise

- **MLOps & Orchestration:** Docker, Kafka, Model Fine-Tuning Pipelines (QLoRA), Workflow Automation (n8n), CI/CD.
- **Model Deployment & Serving:** FastAPI, Nginx, LLM Serving & Quantization, Edge Deployment, REST APIs.
- **Cloud & Infrastructure:** AWS (EC2, Bedrock), GCP, Linux/Ubuntu System Administration, Vector Databases (FAISS), PostgreSQL.
- **Languages:** Python, C++, SQL, Bash Scripting.

Related Work Experience

Ecommerce Steem - AI Developer (Project Basis)

Jan 2026 – PRESENT

- Architecting **AI Chat Software** for wearables (Whoop), focusing on low-latency and lightweight inference.
- Developing interfaces that process live biometric data to deliver real-time health and performance insights.
- Implementing adaptive feedback loops based on user activity levels and physiological markers.
- Optimizing LLM prompt strategies and context management to ensure accuracy within hardware constraints.

QUIDSol - AI & Computer Vision Developer

2025 – PRESENT

- **Project Horus (Student Identification):** Engineered a CV pipeline that triggers automated frame capture as students move, using **YOLO/SCRFD** for detection and **ArcFace** for ID assignment via **FAISS**.
- **Silmaril AI:** Developed a strategic platform for investors; built an AI-driven parsing engine to extract financial metrics from pitch decks and provide automated growth recommendations and founder insights.
- Leveraged **Natural Language Processing** to categorize startup sectors and assess business model viability.
- Enhanced pipeline reliability by optimizing data-flow to maintain accuracy across varied lighting conditions.
- Managed database logging and results triage to ensure high-speed processing across diverse topics.

Teacher's Assistant

Information Technology University

- Mentoring MS students in **Agentic AI**, providing guidance on autonomous multi-agent systems and RAG.
- Facilitating workshops on agent orchestration and evaluating complex workflows for scalability and efficiency.
- Debugging and refining student-led AI projects to ensure adherence to production-level engineering standards.

Education & Key Projects

Bachelor's in Computer Science (BSCS)

2021 – 2025

Information Technology University (ITU), Lahore

Specialization: *Agentic AI, CV, RL*

- **Airbnb Replica:** Engineered a MERN stack application with property management and secure JWT authentication.
- **Query Sphere:** Developed a Flutter-based community app with real-time messaging and Firebase integration.
